Midhun Mohanan

Solution Architect · Android & Flutter

Kochi, Kerala, India midhunarmid@gmail.com linkedin.com/in/midhunarmid profile.armid.in

SUMMARY

Solution Architect with 15+ years of building mobile apps, from native Android in Java and Kotlin to cross-platform Flutter. Has led teams and products for global clients, the travel and hospitality industry and large-scale e-commerce, and cares about apps that are fast, scalable and pleasant to use. Mentors students and junior developers, and writes Flutter tutorials for beginners.

EXPERIENCE

Solution Architect · IBS Software — Dec 2024 – Present

- Architects mobile solutions for airlines and the travel, tourism and hospitality industry, covering the journey from booking to boarding and beyond.
- Shapes system design and technical direction before development starts.

Assistant Consultant · Tata Consultancy Services — May 2021 – Dec 2024

- Built Android Lounge Management and Meet & Greet apps for airport ground staff and crew.
- Led the Flutter front-end Customer Identity team for the Tata Neu e-commerce super app, owning authentication, address management and profile.
- Designed customer-facing screens and features across the identity journey.

Product Lead · Pinmicro — Mar 2020 – Mar 2021

- Led mobile apps for an IoT indoor-positioning platform using BLE beacons and triangulation to locate assets and people indoors.
- Led the official CEATEC 2019 (Tokyo) event app: a Flutter front end on native Android and iOS SDKs. It ranked #1 on both the Play Store and App Store throughout the event and won the Team Awesome Award.

Tech Lead · Innovature Labs — Mar 2011 – Feb 2020

- Grew from Trainee to Engineer, Senior Engineer and Tech Lead over nine years of shipping Android apps for global clients, from first sketch to store release.
- Worked across Tizen, BlackBerry, Appcelerator Titanium and React, and introduced Flutter to the team.
- Employee of the Year 2017 (finalist 2016).

SKILLS

Mobile	Android, Kotlin, Java, Flutter, Dart (Android, iOS, web)
Engineering	Solution architecture, performance, real-time apps (WebSocket), mobile app design, code review
Ways of working	Team leadership, mentoring, AI-assisted development (GitHub Copilot, Claude)
